

COMPLIANCE REVIEWS OF STATE AGENCIES -

Since 2001, the MSBRPG has been reviewing geoscience reports that are being generated in and/or are being submitted to state agencies to ensure that they are being properly signed and stamped by RPGs, that those who are submitting such documents are registered to practice, etc. as required pursuant to the Geologist Practice Act of 1997, as amended, and the Rules and Regulations of the Board. RPGs, GITs, and members of the public are encouraged to report any such activities that may be in violation of the Act and/or the Rules and Regulations of the Board to the agency's Executive Director.
